Manufacturer and Exporter
Leather Bags & Accessories

INTRODUCTION

Kabir Leathers, Design to Delight.

Since 1995, we have been producing Leather bags and accessories for the global market.

Every thing we produce at Kabir is of the best quality, just because we care and because it bears our name.

Your products are created to reflect your pride in your business. As a result, we pay close attention to every single element of the product and exercise extreme caution during the manufacturing process.

We appreciate the chance to partner with you and pledge to provide cutting-edge technology, on-time delivery, excellent customer service, and exceptional quality.

Kabir has a global consumer base and offers a wide range of leather products in a variety of leathers. You may also use our unrivalled service to create your own styles.

Quality, innovation, and ethical business methods are important to us. Above all we try to improve people's lives through good design.

Why Make In INDIA ?

The Indian Leather sector is worth USD 17.85 billion (USD 5.85 billion in exports and USD 12 billion in domestic sales). India produces 12.93 percent of the world's leather hides and skins. High growth is expected during the next five years. A robust raw material foundation - India has 20% of the world's cow and buffalo population and 11% of the world's goat and sheep population. India produces 2.5 billion square feet of Leather, accounting for roughly 13% of global output.

The Indian Leather sector has one of the youngest labour forces, with 55 percent of the workforce under the age of 35. India is the world's second largest manufacturer of Leather goods and accessories. Advantages in terms of production costs and labour expenses when compared to other major manufacturers countries. Skilled/trained labour is offered for a new or existing production unit.

QUALITY CONTROL

KABIR has a socially responsible infrastructure in place to respond to their clients' changing demands, as well as a quality assurance staff to ensure that the item is of exceptional quality every time. They employ the best machines to ensure product perfection and are continually reviewing resources, research and development, and technological inputs to produce the greatest results for their consumers. A team of professionals controls a methodical procedure of lab testing, size set review, pilot run and final inspections to deliver the best outcome to the consumer at any functional level. Quality control is monitored using the most recent Japanese and Italian machinery to ensure the highest standards are met and maintained. They also feature an automated in-house washing plant and a dedicated crew led by industry experts.

SAMPLING

SAMPLING CAPACITY: 150 bags per month

Our organisation relies heavily on sampling.

All products in the sampling stage are given extra attention by highly competent tailors and craftspeople.

This department is very busy and excited about new advancements and is critical in producing proto samples, fit samples, and size sets.

We take pride in the huge assortment we have built in our stores over time expressly for sampling, which comes in handy when creating a wide range of rapid but effective mock ups based on the buyer's requirements.

PRODUCTION

To maintain high quality and efficiency requirements, the floor is outfitted with the most modern manufacturing facilities and specialised machinery.

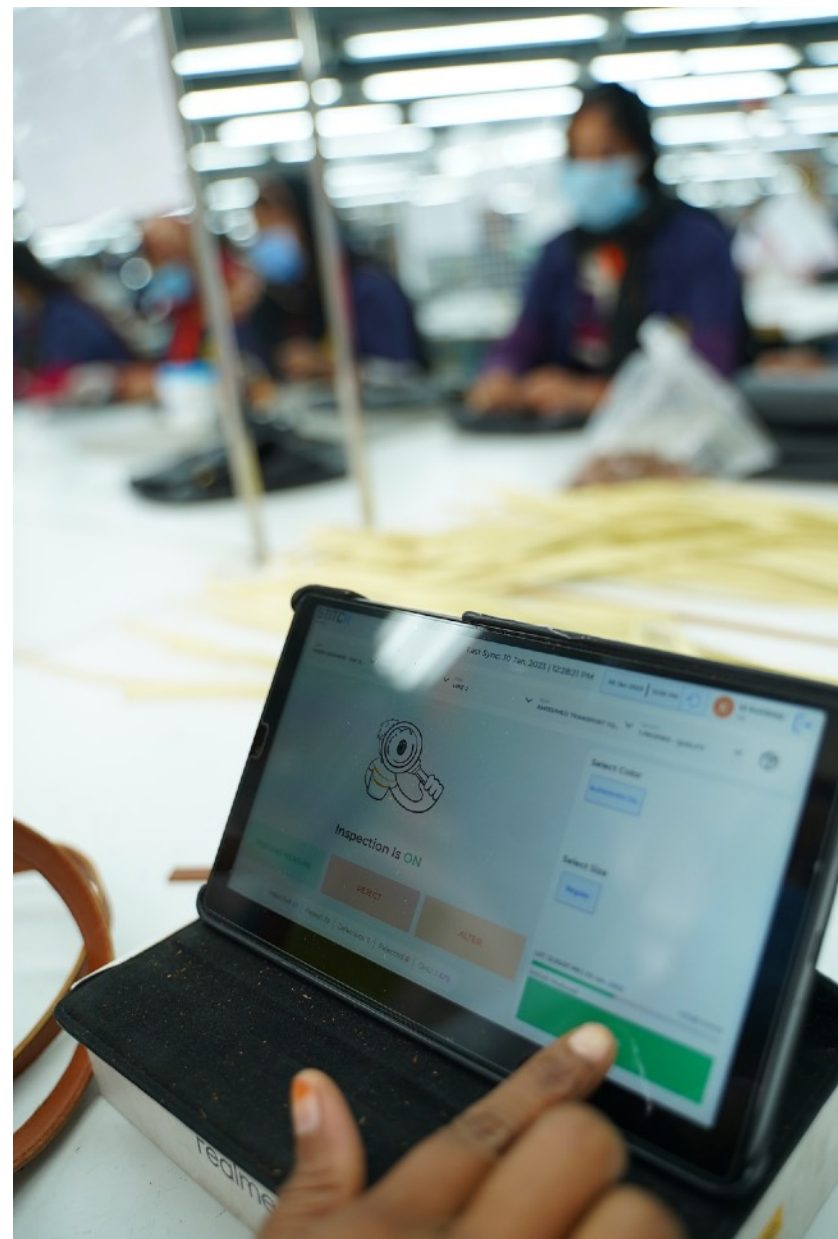

These machines are managed by our very own most experienced and competent workers who meticulously and with maximum attention get all the bags under production manufactured on schedule while also taking care of all the necessary aspects.

Our complete production and sample unit is housed under one roof, and the benefits are seen in our work.

This allows us to significantly reduce production time while still ensuring that the end products are in the finest possible condition.

INFRASTRUCTURE

The current manufacturing network at Kabir is comprised of cutting-edge infrastructure designed to meet the needs and specifications of each customer. Their production performance is governed by technological boundaries, perfection, internal quality audits, on-time deliveries, and the vitality of experienced labour to cater to our appreciated clientele.

KABIR takes pride in investing in the following specialised equipment to enhance the overall execution and quality of each piece.

Specialised machines to ensure quality and manufacturing standards are met. Automated and specialised sewing machines, embroidery machines on a computer .

PRODUCT RANGE

We have been able to create an incredible line of products ranging from different types of ladies bags and accessories.

It's all the combined efforts of the constant development of ideas and innovation by our skilled designers, merchandisers, crafts persons, and the highly creative team of the Kabir Leathers.

We constantly create, research & develop new ideas & techniques to do on leather with focus on innovation.

OUR TOP PICKS

Working closely with the tannery, Kabir Leathers has access to many beautiful leathers of varying qualities. Special leathers and techniques can be developed according to buyers requests and in response to key trends.

These leather are premium quality and speaks for itself. By keeping the silhouette very classy, we try to highlight the leather that looks more minimalist and chic.

Nothing looks more work appropriate than a sturdy top handle bag. They're professional, practical and sleek.

minimalist CHIC

Woven Bags

Weaving is a craft that is strongly associated with India. It is a technique that creates a beautiful feel for the bag adding a layer of texture.

Due to our strong Research & Development department, we constantly create new & interesting woven panels which convert beautifully into bags.

Our highly skilled workers work tirelessly throughout the day to keep innovating & exploring different weaves. We employ highly skilled weavers from around India at our factories, who excel in craftsmanship.

BONDED Bags

We specialise in the bonding technique in which we infuse two materials mainly two leathers or a leather & fabric together.

This adds reinforcement to the leather to make it stronger and we don't need to use lining which gives the bags a more contemporary look.
